EXECUTIVE SUMMARY

- This report presents the findings of a data analysis project on the Stack Overflow survey 2019, which aimed to identify key trends and insights in the global software developer community.
- Insights presented in this project:
 - Top Languages, Databases, Frameworks and Platforms for the current year (2019)
 - Top Languages, Databases, Frameworks and Platforms trends for future year based on the data collection and analysis
 - An analysis of how gender, age and country influence the distribution of developers
- Point3

INTRODUCTION

- The main goal of this analysis is to gain a deeper understanding of the current technology and platform preferences of developers, by identifying trends and patterns in their usage.
- The data collected from Stack Overflow survey has enabled us to identify potential future technology trends through our analysis
- Audience
 - Developers
 - Students
 - IT professionals
 - Educators

METHODOLOGY

- **Data Source**
 - Stack Overflow 2019 survey and Results
 - Data Provided by IBM: Technology Dataset and Demographics Dataset
- **Data Cleaning:** Python libraries Pandas and NumPy used to load data and perform cleaning techniques
- **Data Analysis:** Exploratory Data Analysis (EDA) is performed by using SQL queries
- **Data Visualization**
 - Matplotlib and Seaborn
 - IBM Cognos

RESULTS

1	9	I am a developer by profession	Yes	Once a month or more often	The quality of OSS and closed source software ...	Employed full-time	New Zealand	No	Some college/university study without earning ...	engin
2	13	I am a developer by profession	Yes	Less than once a month but more than once per ...	OSS is, on average, of HIGHER quality than pro...	Employed full-time	United States	No	Master's degree (MA, MS, M.Eng., MBA, etc.)	engin
3	16	I am a developer by profession	Yes	Never	The quality of OSS and closed source software ...	Employed full-time	United Kingdom	No	Master's degree (MA, MS, M.Eng., MBA, etc.)	
4	17	I am a developer by profession	Yes	Less than once a month but more than once per ...	The quality of OSS and closed source software ...	Employed full-time	Australia	No	Bachelor's degree (BA, BS, B.Eng., etc.)	engin
...	
11547	25136	I am a developer by profession	Yes	Never	OSS is, on average, of HIGHER quality than pro...	Employed full-time	United States	No	Master's degree (MA, MS, M.Eng., MBA, etc.)	engin
11548	25137	I am a developer by profession	Yes	Never	The quality of OSS and closed source software	Employed full-time	Poland	No	Master's degree (MA, MS, M.Eng., MBA, etc.)	engin

PROGRAMMING LANGUAGE TRENDS

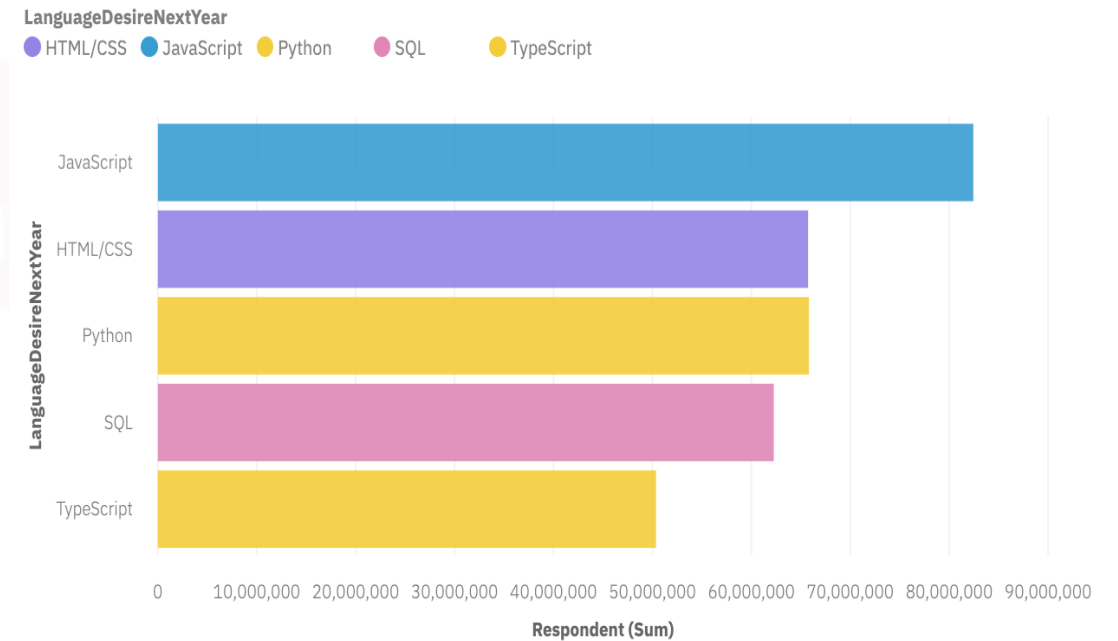

Current Year

Top 5 programming languages Used by Developers in 2019

Next Year

Top 5 Desired programming languages for Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript and HTML/CSS most popular languages for year 2019 and for upcoming year
- Python and SQL has a large popularity among developers
- Python has gained interest for the next year

Implications

- Increasing Demand on Python will result in the growth of AI and machine learning field
- Web development languages JavaScript and HTML/CSS will continue to be popular
- SQL expected to remain in trends and increases a chance of employment in Big Data field

DATABASE TRENDS

Top 5 databases for the 2019 year

DatabaseWorkedWith

Microsoft SQL Server MongoDB MySQL PostgreSQL SQLite

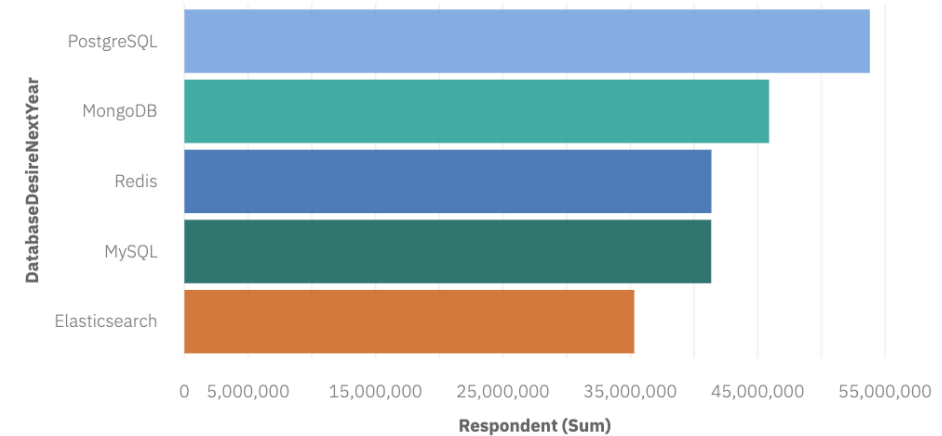

Next Year

Top 5 databases for the next year

DatabaseDesireNextYear

Elasticsearch MongoDB MySQL PostgreSQL Redis

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL was the most popular Database in 2019
- PostgreSQL and MongoDB were quite popular in 2019
- Microsoft SQL Server had a huge popularity among developers

Implications

- MySQL is likely to remain in trends and become one of the essential skills for all developers
- PostgreSQL and NOSQL database MongoDB is considered to be learned by most developers
- The demand on both NOSQL and SQL database will be increased for managing structured and unstructured data and they will be one of the top requirements skills by employee

Respondent classified by Gender

Gender
● Woman ● Man

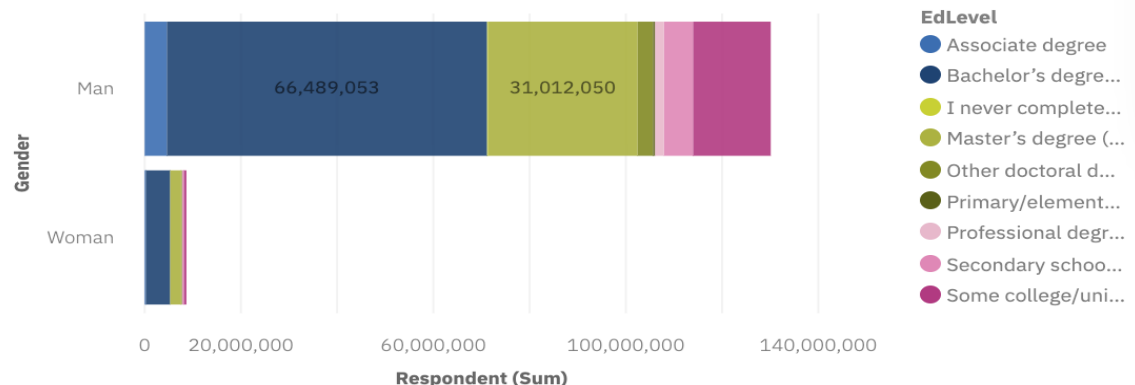

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

DISCUSSION

- After conducting a comprehensive analysis of the 2019 survey data we can gain valuable insights:
 - ✓ The gender gap ratio in this field of IT
 - ✓ The recommended programming languages, Databases, and Platforms for developers to be learned
 - ✓ The group age that most likely in the fields or participated in the survey

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript, HTML/CSS and Python remains on the top trend. TypeScript has become more popular
- There is a high gender gap, we can see a significant proportion of males in the IT field
- The difference in count of Developers and Professional based on countries are very high

Implications

- Learning the most trend languages and Databases can help developers to handle big data and participate in AI projects
- Greater number women should be encouraged to pursue their passion for IT
- Learning HTML/CSS and JavaScript can be incredibly helpful for aspiring developers

CONCLUSION

- To conclude the 2019 Stack Over-Flow survey dataset, here is some findings:
- ✓ The recommendations for whom are interested to get into IT field and for whom are aiming to upskill are
- ✓ Language to learn: Python, JavaScript and HTML/CSS
- ✓ Database to learn: NOSQL and SQL
